FRONT SUSPENSION REPAIR KITS - AUDI / VW / SKODA

When wear occurs in the front suspension of the Audi/Volkswagen/Seat and Skoda vehicles that use the multi-link alloy front suspension system it is often difficult to determine which component actually requires replacement. It has also become well known in the trade that to neglect the signs of wear can lead to dangerous failure.

When replacement of a single part fails to provide a solution, many garages now feel that it is more effective to replace all the wearing parts at the same time. For this reason, we have introduced kits containing all the arms and links needed to rebuild the suspension on these cars. Also included is a set of all the necessary bolts and locknuts.

As well as offering the customer the convenience of buying all the parts needed to do the job in one box there is a substantial cost saving over buying the individual items separately even before the value of the bolts is taken into account.

Kits currently available are:

SS2027 - Audi A4 (95-00), VW Passat (96-00)

Included:

SS628	Tie rod end	x2
SS618	Arm forward upper left	x1
