Oil Sump Pans

What is an oil sump pan?

- + Houses the engines oil for circulation via the Oil Pump.
- + Usually located at the **bottom end of the engine**.
- + Normally includes a **removeable draining plug** for oil changes.

Why do they fail?

- × **Damage from external sources** (Potholes, Speed Humps).
- × **Corrosion** usually from poor paint finishes/damage to outer surface.
- × **Salt & water ingress** from road and environmental effects.
- × **Insufficient seal** between Engine Block and Sump Pan (Gaskets or Sealant).

Why choose FAI?

- ✓ **50 Part numbers** in initial range.
- ✓ **OE** specification.
- ✓ Leak and pressure **tested**.
- ✓ **Steel and aluminium** types in range.
- ✓ Covers **popular vehicle applications**.
- ✓ Each pan includes **sump plugs**.
- ✓ Each pan includes **silicone or gasket**.
- ✓ **High quality** packaging (Only 5 Sizes)

Why should they be replaced?

- Failure will likely result in **engine seizure** due to oil loss.
- **Oil leaks can be dangerous** for the environment and other road users.
- Service critical item - failure can result in **engine contamination/blockages** to the oil galleries.
