# » **COVID-19 Update**

Dear Customer,

We hope that you, your family, your staff and your business are fairing well in these challenging times.

Despite the global struggle against COVID-19, we have managed to remain operational throughout the crisis and continue to do so. One of our main objectives is to continue to serve our customers and do what we can to keep nations road transport systems active. Whilst we are currently functioning with greatly reduced levels of staff, we have still been able to maintain our high service levels to customers throughout the world.

We are constantly reviewing our capacity and staffing levels and will adjust accordingly over the coming months to ensure that our supply to customers remains unaffected. The safety and wellbeing of our staff are still paramount and whilst we have been maintaining distancing in our warehouse and working from home for those that can, we are making preparations to ensure that staff are safe in the inevitable stages of returning to normality.

As we are now seeing order volumes start to increase, the future is looking increasingly positive for the industry and we hope that it is an indication of a bright future for yours too. This is our update as of this week and if further changes do occur, we will update you as soon as possible but, for now, please keep safe.

All the very best,

The FAI Team.

We are continuing to follow government guidelines in all aspects of COVID-19:

- » Washing hands regularly.
- » Social distancing.
- » Isolated work areas.
- » Staff working from home.
- » Anyone with symptoms or family members self-isolating for 14 days.

## Range Rover Sport 2013>

Few manufacturers have achieved the winning blend of characteristics from both the car world and the practicality seen in SUVs; the latter of which usually rolls in the corners like you've got beachballs for tyres. Land Rover not only defied the laws of physics by producing a vehicle that handled on a B-road full of camping gear, but the British brand also managed to produce a package that was as luxurious as it was desirable.

We're all familiar with the second generation of Sport that just like its predecessor, was shaped like a house brick (aerodynamically speaking) but went like stink. Powered mainly by a torquey 3.0 V6 diesel, with only petrol station owners opting for the 5.0 V8 petrol; even the base model surprised onlookers in a traffic light race.

This list of attributes didn't go unnoticed by a discerning customer base that were more than pleased to part with their cash in order to pilot the envy of the highway. Sales swelled throughout Europe and beyond, many of which have been subsequently traded in over its seven years on sale; most likely for another Sport! The demand for used examples was possibly even higher, fuelled by customers loving the baby Range Rover but just not having the readies for a new one.

This continuous 'bull-market' for the Sport has generated a high demand for a quality repair solution, one that can be depended on for years of ownership. Where can you find these quality parts, we hear you ask – FAI of course!

# » New to Range

New from Yenmak.

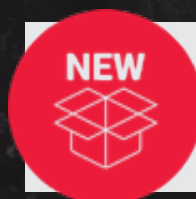

We have been sole UK distributors of the Yenmak Piston and Piston Ring range since 2010 so this year makes it our 10th year in partnership. We have continued to invest in the brand by expanding our range with 157 new part numbers which have started arriving already.

The latest additions to range cover a multitude of popular engines, all of which you can find in the table below.

Celebrating 10 year distribution partnership with Yenmak.

» 157 New Part No's.  
» 68 now in stock!

Application		Part Number

# » *Wheel Bearing Kits*

## Recommended New to Range

Our wheel bearing kit range has been one of our fastest growing and best selling ranges since its launch. Over the past few years, we have expanded the range regularly to ensure that we maintain coverage on the most popular vehicles on the road. Our latest range extension over over 30 references includes Hub Kits and Bearing Kits, all covering a huge selection of common passenger and light commercial vehicles.

# » **Timing Chain Kits**

Coming soon...

## » **TCK330NG**

**AVAILABLE  
SOON**

» Available in May 2020.

» Fits popular Mazda 2.2D **SHY1** & **SHY2** Engines.

» Highly recommended for stock holding.

» This engine is susceptible to chain wear, leading to excessive noise.

» DPF regeneration in engines such as this can cause fuel to dilute the engine oil. This degradation of oil reduces hydraulic pressure to the timing chain tensioner causing increased friction and wear throughout the engine.

## Applications

MAZDA	3	2.2 D	09/2013->
	6	2.2 D & AWD	12/2012->
	CX-5	2.2 D & AWD	04/2012->02/2017

**Engine Codes:** *SHY1* / *SHY4*

# » **Engine of the Month**

## Mercedes 1.8 / 2.1 CDi OM651

Last month we featured the first of Mercedes 'serious' turbo diesels in the form of the 2.1 CDi (OM646) however, the real game-changer was the OM651, arriving alongside the 2008 C-Class (W204). Although fitted throughout popular models within the German brand, it was essential to keep up with the likes of BMW's 2.0d Efficient Dynamics, which fuelled the C-Class's arch nemesis - the BMW 3 Series.

Mercedes designated OM651 powerplants were tuned to either 134, 170 HP or for the higher spec'd models a 200 BHP version, badged C250 CDi. The engine was also used as a platform for the 1.8 CDi, and as you might expect, the two versions share many of the same components. As a combo, the pair powered a big proportion of Mercs' on the road.

Introduced at the height of the diesel boom, the OM651 was never a class leader in terms of refinement but if you wanted an economical Mercedes with a bit of shove then it was the 2.1 or nothing. Thanks to some decent sound deadening, the cabin was fairly insulated from what can only be described as a rattley Taxi to everyone outside the car.

Despite its foibles, the OM651 was an important unit that was utilised for a decade, found in hundreds of thousands of vehicles. This all adds up to a serious amount of business for the aftermarket.
